Product - Consolidation Box

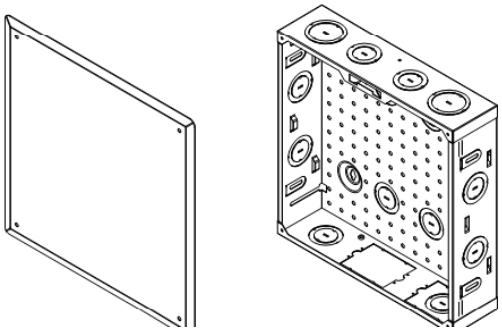
Enclosure Box Accessories

SOHO multimedia enclosures are the primary elements of telecommunication cabling for residential market. The enclosures are designed in compliance with TIA-570-B Residential Telecommunication Infrastructure Standard and the EIA-600 Consumer Electronics(CEBus). They can hold all distribution modules you need from voice/telephone, data/computer networks, CATV, satellite TV to in-house broadcasting audio/video systems, and can be flush mounted during the rough-in phase of installation.

Consolidation Box
14inch X 14inch

with Cover :
LS-CB-1414-C

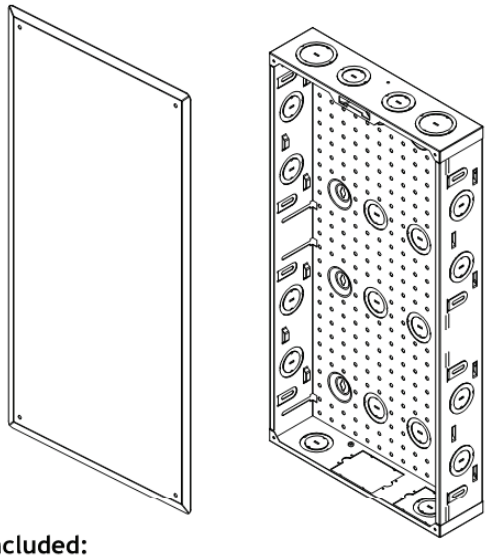
with Hinged Door :
LS-CB-1414-H



Consolidation Box
14inch X 28inch

with Cover :
LS-CB-1428-C

with Hinged Door :
LS-CB-1428-H



Parts Included:

#10-12 wall self-tapping screws	X4
#8-32 cover mounting screws	X4
#8-32 grounding screw	X1
Label	X1

NOTE:

1. The enclosure is a distribution device for low-voltage wiring systems. It is not designed to be used as an AC power distribution panel.

2. The grounding screw is for EMI purpose only, not for active equipment grounding use. If a true grounding is required, a proper grounding connection between grounding screw and AC power outlet ground point be should compliant with NEC(national electrical code) and to be verified by a qualified electrician. A minimum 14 AWG, bare copper, solid conductor wire and a washer are required to complete an appropriate grounding connection.

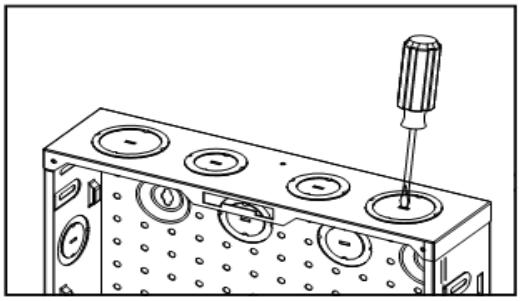
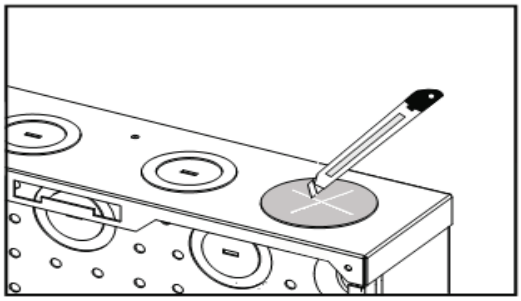
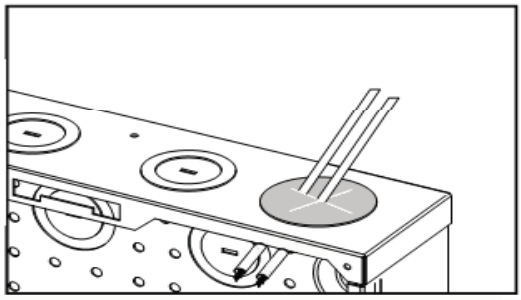
Step 1.

Remove knockouts before mounting the enclosure into the well.
Use the foam grommets with knockout openings to protect cables.





1. Place 1 foam grommet over each knockout.
2. With a utility knife, cut an "+" through each grommet.

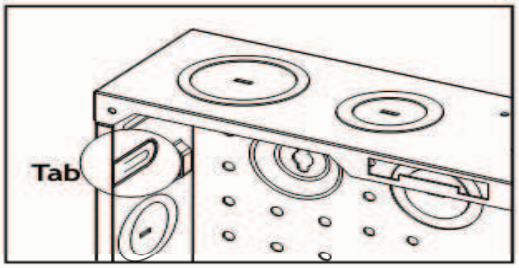


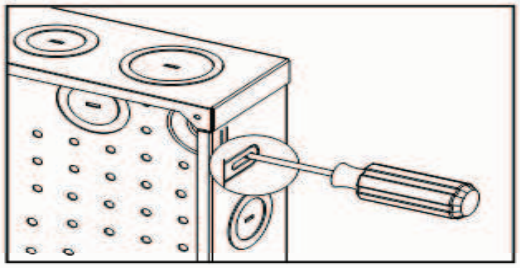
Tools needed to install your Enclosure box

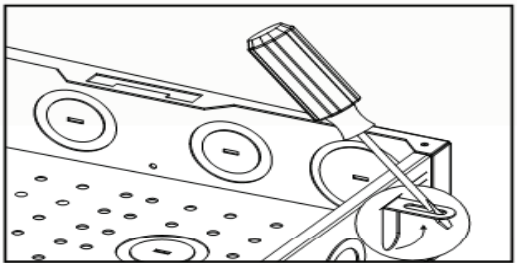
Slotted / Screwdriver / Utility Knife.

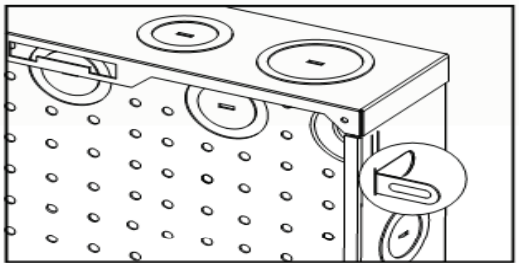
Step 2.

Bending out tabs on the enclosure.









1. Insert screwdriver into tab hole from the out side.
2. Push screwdriver right/left to bent out tab.
3. Place 1 foam grommet over each tab hole opening on the inside of the enclosure.
